Our Overdrive service provides eBooks that are compatible with e-ink Kindles, such as the Kindle Paperwhite. You will need the following information:

- Your library card number
- Your Amazon.com account login and password

Questions? Please email us at eref@winnetkalibrary.org or call us at (847)446-7220.

**Please note:** Amazon keeps a record of what you download through this service, and will use that information for its purposes. The library is unable to enforce its privacy policy on Amazon’s end.
1. Visit www.amazon.com on a computer, smartphone, or tablet (not your Kindle). Log in using the account information you have registered with your Kindle.

2. Once you are logged in to Amazon, visit this website to access our eBooks:

   winnetkalibrary.overdrive.com

Hit the Sign in link in the upper right:
3. Enter your library card number on the following screen.

4. Once logged in, you are ready to find a book!

You can browse using the Kindle Books link in the upper left, or search by title or author using the search box in the upper right:
5. eBooks are licensed by the copy, like physical books, so popular titles may be checked out and unavailable. On any results page, click the Available Now option to only see books that can be immediately downloaded.

6. When looking through results, make sure to note the difference between eBooks (for reading) and eAudiobooks (for listening). The format is listed underneath the title:
7. The bar running across the top of each cover will tell you whether the book is available or checked out:

8. Once you find a book that you’re interested in, tap Borrow (if the book is available) or Place a Hold (if the book is checked out.)

- If you Place a Hold, you will be asked for your email address, and then emailed when the book is available.
- If you Borrow the book, it will be sent to your Loans page (see below.)
9. After you check out a book, you will be prompted to select the format. Choose Read now with Kindle.

10. You will be directed back to Amazon.

The Amazon page should show a Get Library Book button to the right. The dropdown menu underneath lets you choose how you want to transfer it, and to which device. Make sure it is displaying the name of your Kindle.
11. If you are on a wi-fi network, then the book will transfer automatically, and will be usable just like a regular Kindle book. Give your device several minutes to sync, and it should appear in your Kindle Library.

If you see it on your Kindle, you’re finished!

If you do not have access to a wireless connection (or have an older Kindle without wi-fi support) then you will need to transfer the book via wired connection.

Please see the following pages for instruction on wired transfer.

12. To begin wired transfer, go to your Amazon account, and choose Your Content and Devices:
13. Look for the book you checked out, and clicked the menu button to the left of the title:

14. Choose **Download & transfer via USB** from the ensuing menu:
15. Choose your device and click Download:

Transfer Tip: After downloading, use your USB cable to connect your computer and Kindle. Your Kindle will appear as a drive on your computer. Copy your downloaded file from your computer to your Kindle’s documents folder.

16. You will be prompted to save the file, or the file will download automatically, depending on how your computer is configured. The file will save to your default download folder.

If you do not know where the file is saved, you can search your computer for “azw” to find any e-book file in the kindle format.
17. Attach your Kindle with the USB cord, and open the drive on your computer.

18. The last step is to transfer the downloaded file to the documents folder of your Kindle, either by cutting and pasting or clicking and dragging.

Safely detach your Kindle by ejecting it, and you’re finished!
